Table Involved in Query Execution

Identifies queried tables and columns to reveal join logic and data access patterns.

Columns	Data Type	Default Value	Constraints
guid Indexed	character varying		NOT NULL, PRIMARY KEY
resource_version Indexed	bigint		
group Indexed	character varying		NOT NULL
resource Indexed	character varying		NOT NULL
namespace Indexed	character varying		NOT NULL
name Indexed	character varying		NOT NULL
value	text		
action Indexed	integer		NOT NULL

label_set	character varying		
previous_resource_version	bigint		
folder	character varying	::character varying	NOT NULL
generation Indexed	bigint	0	NOT NULL
key_path Indexed	character varying	::character varying	NOT NULL

Index Details

Shows available indexes that can speed up query filtering and lookups.

Index Name	Columns involved / Expressions	Nullable	Un
resource_history_pkey	guid	No	Ye
IDX_resource_history_group_resource_resource_version	group resource resource_version	Yes	No
IDX_resource_history_key_path	key_path	No	No
IDX_resource_history_namespace_group_resource_action_version	namespace group resource action resource_version	Yes	No
IDX_resource_history_namespace_group_resource_name_generation	namespace group resource name generation	No	No
IDX_resource_history_resource_action_version_name	group resource action resource_version name	Yes	No
IDX_resource_history_resource_version	resource_version	Yes	No
UQE_resource_history_namespace_group_name_version	namespace group resource name resource_version	Yes	Ye

Foreign Key Name	Column	Referenced Table	Referenced Column
No foreign keys found
